PROFILE

Results-driven Website Developer with 3+ years of experience building high-performance, SEO-optimized websites using WordPress and React.js. Delivered 30+ client solutions across diverse industries with measurable improvements in user engagement (25%) and conversion rates (40%). Currently pursuing BSCS at SZABIST University (CGPA: 3.70/4.00) while maintaining an active freelance practice on Upwork.

WORK EXPERIENCE

Website Developer | Upwork (Remote) | September 2024 – Present

- Delivered 30+ website solutions for clients across multiple industries including HVAC, business agencies, education, healthcare, real estate, and professional services using WordPress and React.js.
- Expertise in WordPress builders including Elementor, Elementor PRO, Oxygen, Divi, WP Bakery, Gutenberg, and premium themes like Avada, Astra, and Woodmart.
- Developed interactive React websites using component-based architecture, webhooks, useState, React Router, and Styled Components, improving user engagement by 25%.
- Integrated tools including Mailchimp, HubSpot Forms, Contact Form 7, Forminator, ACF, WooCommerce, WPML, LiteSpeed Cache, and Zapier automations to enhance workflow and client operations.
- Built custom WooCommerce stores with advanced product filtering, AJAX functionality, and payment gateway integrations, resulting in a 40% increase in conversion rates.

Website Developer Intern | Meta Perficent – Karachi, Pakistan | March 2024 – August 2024

- Assisted senior developers in building 35+ responsive WordPress websites for business clients and troubleshooting frontend issues.
- Implemented design changes, fixed bugs, and optimized page load times, achieving 90+ Lighthouse performance scores.
- Converted Figma and Adobe XD mockups into pixel-perfect, functional websites with cross-browser compatibility.
- Gained hands-on experience with HTML, CSS, JavaScript, WordPress CMS, and mobile-first responsive design principles.

KEY PROJECTS

VSL Packaging Company – Website Design & Development

Tech Stack: WordPress, Divi, Contact Forms, Dynamic Posts & Sections

Developed a fully responsive website for a New York-based packaging company. Redesigned the existing site and built full functionality with Divi Theme. Website is SEO-optimized and performance-tuned.

Crypto Knowledge IQ Quiz Platform

Tech Stack: HTML5, CSS3, JavaScript (ES6+) — optimized, vanilla codebase

Designed and developed an interactive quiz platform where users can take IQ-style and knowledge quizzes. Built a Crypto Knowledge Quiz as the flagship experience: users complete the quiz, fill out a result form, and can optionally pay to receive a personalized certificate. Entire project built with efficient, framework-free vanilla JS.
